

IceFree™

Antifreeze Gel System

A specialty, non-freezing gel which is pumped into conduits (around cable) to prevent water ingress and subsequent ice formation.

This system has successfully protected fiber optic cable in thousands of bridges exposed to below freezing temperatures.

- Prevents water ingress and ice formation in innerducts and conduits
- Protects fiber optic cable from ice pressure-induced microbends
- Compatible with cable jacket and duct
- Safe for the environment
- Patented system
- Avoids system downtime due to cold-weather signal degradation
- Protects all cable from ice damage
- Soft gel allows cable removal for repair or upgrade
- Install once for multi-year protection
- Installation video and literature available
